

On 9th December 2007, Brisbane's Lord Mayor Campbell Newman officially opened the Forest Lake Water Treatment Plant as part of the regional drought relief strategy. Collectively, these 5 (Sunnybank, Runcorn, Algeester, Chandler & Forest Lake) plants provide an additional 20ML/d of high quality potable water into the network. Despite the very challenging programme, all plants to be delivered for Brisbane have been commissioned well ahead of the Target Date of 31st December 2007, a clear demonstration of the commitment and excellent performance of the BCAA Alliance Team.
